WE DRY BEST

NORDIC
POWER DESICCANTS

When it comes
to moisture control...

THERE IS ONE SURE SOLUTION

Every year close to 150 million containers are shipped by sea. The cargo in 20 % of these are in danger of being damaged by humidity causing mold, corrosion, rust, caking, fungus and mildew. This problem costs manufacturers, freight forwarders, shipping lines, trading companies, importers and customers, billions of dollars every year.

NORDIC POWER DESICCANTS

helps you conquer humidity problems in containers shipped by sea.

COMPANY PROFILE

VISION

To be the leading company in the world, relentlessly pursuing innovation in the area of safe transportation of cargo in containers by sea, thereby providing the safest, easiest to use and most economical methods in moisture and condensation control.

MISSION STATEMENT

- To help customers and associates develop their businesses by providing them with complete solutions to perform better in their areas of operation.
- To ensure complete moisture control of related problems by producing and supplying products that are environmentally safe, cost effective and easily available worldwide.
- To help customers, by not only providing them with an efficient and on time service - but also by sharing our time tested experience and knowledge, by guiding them in moving goods safely and profitably around the world.

PRODUCT AND SERVICES

We have over twenty years of experience in shipping goods safely. Through extensive research, we have developed the most effective desiccant on the market today.

Our products are protecting cargo, shipped by sea, against moisture and condensation damage. Moreover, we offer our customers the best advice to eliminate the risk of water damage during shipment.

WHY NORDIC

When your shipments are in need of safe and trustworthy solutions during transport by sea, you may be rest assured that with Nordic Power Desiccants, we have over 20 years of experience in shipping goods safely. Through extensive research, we have developed the most effective desiccant on the market today.

We guarantee that our products are representing the best way of insuring your cargo against destruction by humidity that will be found in every container being shipped. Since we carry out the R&D and the quality control in our own plant, we ensure that the products are totally effective, environmentally safe and most cost effective.

From our different offices and through our agents, we can serve you and your needs wherever you may be located.

HOW DOES NORDIC WORK

This unique product absorbs moisture by extracting water vapour present in the air, thus preventing the humidity inside the container from reaching dew point and condensing. The desiccant then starts to turn into cake as it continues to absorb moisture. The water absorbed is retained due to the presence of a special binding agent that prevents it from leaking.

WE DRY BEST

RESEARCH AND DEVELOPMENT

We are constantly and relentlessly pursuing perfection throughout our company. We simulate containerized shipments under laboratory-controlled conditions in order to monitor and, if necessary, adjust product composition.

We have also carried out many real time tests with "humidity loggers" to determine what is happening inside a container during shipment. In addition we are also involved in many projects in related fields like alternative fumigation methods, studies about pesticide and others.

Since we carry out the Research and Development and the quality control in our own plant, we ensure that the products reach their maximum efficiency, and are cost effective and environmentally friendly

NORDIC PROTECTS

AGRICULTURE PRODUCTS

Coffee, tea, tobacco, rice, flour, starch, pepper, ginger, cashew nuts, ground nuts, betel nuts, cocoa, copra, vegetables, fruit, etc.

WOODEN PRODUCTS

Furniture, mouldings, timber, wood pulp, paper products, etc.

ELECTRICAL GOODS

Appliances, cables, toys, etc.

LEATHER GOODS

Footwear, bags, garments, furniture, etc.

METAL PRODUCTS

Sheets, coils, machinery, auto spare parts, aluminium billets, copper products, etc.

TEXTILES

Garments and fabrics, etc.

Non-toxic

Nordic Power Desiccants are completely non-toxic and environmentally safe, which means they can be safely used with agricultural and food products. Moreover they can be easily disposed of as they are completely harmless.

Leak proof

This unique product converts the absorbed moisture into cake thus preventing it from leaking. And its special SPUNBOND packing ensures one way absorption only thus retaining the absorbed moisture completely.

130% more

Nordic Power Desiccants are designed to absorb more than 130% of its own weight.

Fewer units, more savings

With twice as much absorption than other desiccants, you use fewer units which means greater savings for every container you ship.

No kraft paper required

By absorbing excess moisture in the air, it prevents the relative humidity from reaching dew point and condensing thus preventing condensation and the need to use kraft / mump paper.

No more condensation

Nordic Power desiccants are guaranteed to ensure your container shipments remain condensation free.

PRODUCTS

Our products are specifically designed to meet your needs for safe transportation of your cargo all over the world. Basically they eat humidity. With Nordic products, less is more. You need fewer and smaller units that perform 40 - 60% better than any other desiccant on the market!

PICCOLO

Available in sizes of :
25 gms, 100 gms, 200 gms, 250 gms, 1 kg, 2 kgs, and 5 kgs

This product saves valuable space and can be used for all types of agricultural and leather goods

MAGNUM

Available in sizes of:
750 gms, 1250 gms, and 2000 gms.

This is a hanging type product used exclusively with furniture, metal and electronic goods shipments.

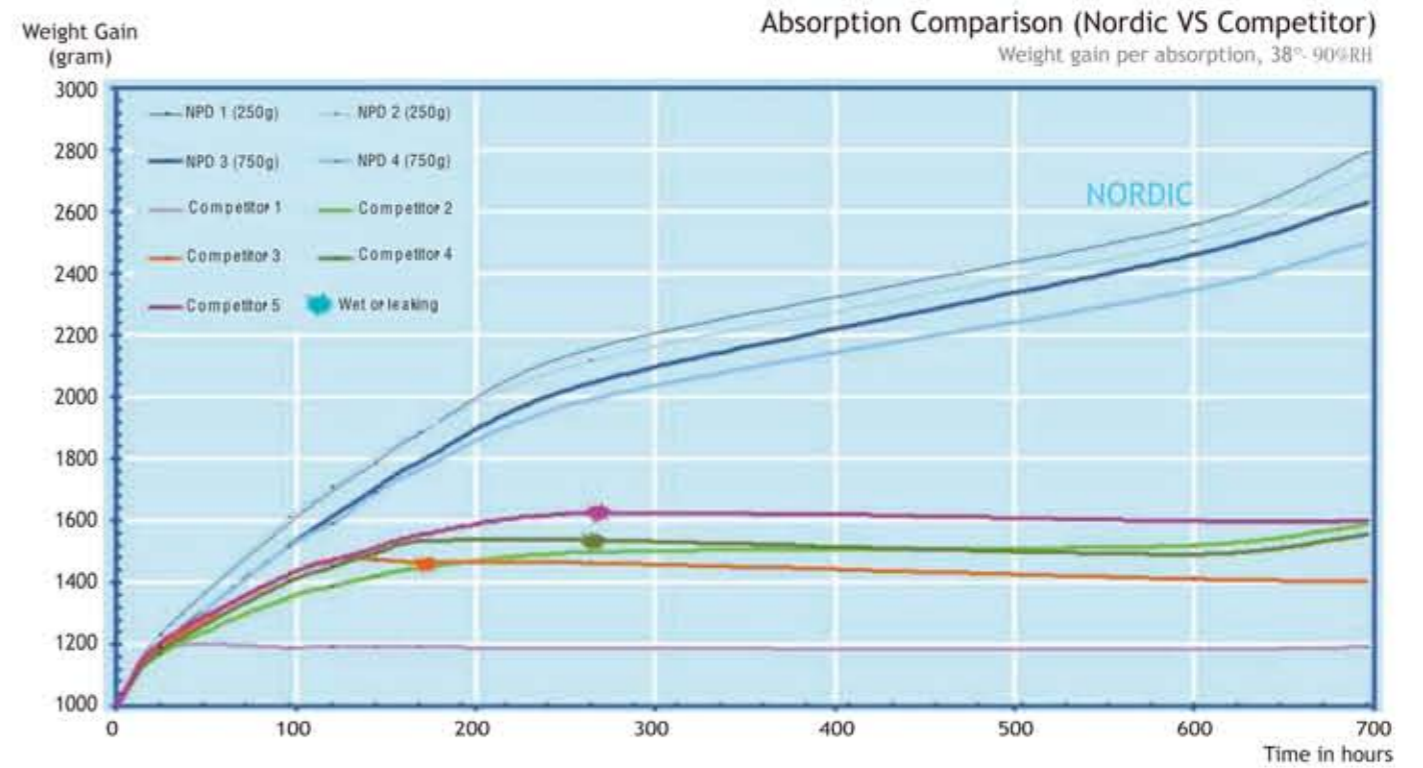

Nordic features

- Completely Leak proof
- Does not obstruct loading space
- Easy and safe to handle
- Cost effective
- Environmentally safe (non-toxic)
- Easily Disposed
- The cheapest insurance in the world

FREEDOM FROM

- MOLD
- CORROSION
- RUST
- CAKING
- FUNGUS
- MILDEW

The chart shows a comparison study between Nordic and five other leading desiccant brands. Nordic has clearly outperformed the other products while they have stopped absorbing moisture effectively after just 8 days; three of the competing brands have even experienced leaking bags. At the time of termination of this study Nordic had absorbed more than 250% of its own weight in moisture without leaking. The trend shows that it will continue to absorb.

Helpline

Our humidity experts are waiting to answer any questions / queries that you may have regarding moisture or humidity problems in container shipments.
